

Cardiovascular Public Service Announcement (PSA)

For this assignment you will be creating a PSA about a health concern or recommendation having to do with the heart. It might be about ways to prevent heart disease, it may be providing information on one specific form of heart disease, it may provide information about making choices that are good for one's heart. Use your imagination and be creative! You will have until the end of the week to decide what you are doing it on and you will submit a "commitment paper" to Mrs. Strong at that time.

Things that MUST BE INCLUDED in your PSA:

- Clearly stated problem you are addressing or recommendations you are making
- At least one reference of where your information is from ("According to _____, blah, blah.")
- Your PSA must be 1-1.5 minutes
- Must be uploaded by due date
- Organization and Creativity

*Read through the rubric for more details.
